

Re: Feroz Khan expands Think-Tank structure to include USA

June 13th, 2012

Washington, D.C.: Convener PTI Think-Tank, Mr. Feroz Khan expanded the think-tank structure by creating a chapter for the United States. Ms. Narjis Ali was appointed the Think-Tank coordinator for U.S.A.

The purpose of creating a U.S. chapter is to enhance PTI's subject matter expertise by engaging professionals of various specialized backgrounds within the U.S. and extend policy recommendations to the central think-tank body in Pakistan. The core group of the U.S. think-tank include Adam Kamran, Sajjad Burki, Farhan Bhaba, Ali Asim Khan and Zaigham Rizvi.

The U.S. core group had earlier delivered a presentation to Feroz Khan outlining recommendations on enhancement of revenue collection, reduction of corruption through extensive transformation and automation of government processes (e-Government), and improvements in ethics and civic sense in the population at large and in government in particular.

Mr. Feroz Khan urged the professional community in the U.S. to enhance their participation and provide assistance towards the policy making mechanism within PTI while speaking with World Bank representatives in Washington, D.C.
